Evian Natural Spring Water - Annual Water Quality Report

At Evian we are proud of the quality of our products. Evian Natural Spring Water is distributed nationally and meets or exceeds all bottled water standards for quality and safety at the Federal and state level. The US Food and Drug Administration (FDA) regulates bottled water as a food. Our scientists and independent certified laboratories perform extensive tests on the water source and finished bottled water product to ensure we exceed or are compliant with all Federal and state bottled water requirements.

In addition to existing stringent regulatory standards, the International Bottled Water Association (IBWA) maintains a strict Model Code of quality for its members. Evian is a member of IBWA and meets or exceeds the quality requirements of the IBWA's Model Code. Additionally, we take pride in the fact that our bottled water production plant is annually inspected, on an unannounced basis, by an independent testing organization, NSF International (NSF). Based on unannounced annual plant inspections and product testing, NSF certifies that Evian Natural Spring Water complies with federal and state bottled water regulations and IBWA's Model Code. NSF is located in Ann Arbor, Michigan. For more information about IBWA and NSF, please visit their websites at http://www.bottledwater.org and http://www.nsf.org or call IBWA at 1-800-WATER-11 and NSF at 1-800-673-6275.

Evian Natural Spring Water Source

Evian Natural Spring Water begins its journey as rain and snow at the top of the French Alps. It takes at least 15 years for every drop of Evian to filter through the glacial sand formations of the French Alps. It is also during that long journey that Evian acquires its unique, well-balanced, mineral composition. Evian's mineral composition has remained unique since it was first recorded in 1807, an additional proof of its quality.

Evian Natural Spring Water Bottling

Evian Natural Spring Water is bottled exclusively at its protected natural spring source (Cachat Spring), which lies at the very foot of the French Alps, far from any urban or industrial development. The Cachat Spring name is clearly stated on the Evian's label. Evian's source is approved by several regulatory agencies based on a detailed and extensive review.

The high quality of Evian both at the source and after bottling is controlled by analytical tests. These tests verify that the water is not contaminated in any way. Several hundred tests are performed daily both on the source before the water is bottled and on the finished product to verify the constancy of the mineral composition, the absence of pollution and the quality of the plastic bottles. The stainless steel piping from the spring directly to the plant and the filling equipment are designed to protect Evian's purity, in addition to the automated bottling equipment which is maintained under strict sanitary conditions.

Water Quality Data

Attached is a copy of our most recent extensive water quality testing conducted by the independent certified laboratory, NSF. The NSF Report lists the water quality test results for over 175 substances including inorganics (metals, minerals, etc.), organics (pesticides, herbicides, etc.) and microbials as well as physical parameters. Evian Natural Spring Water is analyzed for both regulated and unregulated substances. This Report contains the substance analyzed, approved test method used, test result, minimum detection limit, measurement unit, date analyzed and FDA Quality Standard for bottled water, if applicable. The FDA Quality Standards are the maximum allowable levels for over 80 substances in bottled water.

Evian Natural Spring Water is in full compliance with all federal, state and industry bottled water standards.

For more information about Evian Natural Spring Water call 1-800-633-3363 or write to us at Evian Consumer Care, PO Box 1625, Horsham, PA 19044

Sodium in Drinking Water by ICPAES (Ref: EPA 200.7)	2-FEB-2022		
Sulfate as SO4 (Ref: EPA 300.0)	31-JAN-2022		
Surfactants, Methylene Blue Active Substances (Ref: SM 5540-C)	31-JAN-2022	16:02	
Thallium in Drinking Water by ICPMS (Ref: EPA 200.8)	2-FEB-2022		
* Phenolics, Total Recoverable (Based on EPA 420.4)	1-FEB-2022		
Zinc in Drinking Water by ICPMS (Ref: EPA 200.8)	2-FEB-2022		
Organic Chemicals			
Diquat (Ref: EPA 549.2)	14-FEB-2022		10-FEB-2022
Endothall (Ref. EPA 548.1) - (ug/L)	7-FEB-2022		4-FEB-2022
Glyphosate (Ref: EPA 547)	31-JAN-2022		
Perchlorate (Ref: EPA 314.0)	16-FEB-2022		
2,3,7,8-TCDD (Ref: EPA 1613B)	7-FEB-2022		6-FEB-2022
Carbamate Pesticides (Ref: 531.2)	7-FEB-2022		
Semivolatile Organic Compounds (Ref: EPA 525.2)	17-FEB-2022		15-FEB-2022
Volatiles: EDB and DBCP (Ref: EPA 504.1)	2-FEB-2022		
Volatiles: Regulated and Monitoring VOC's (Ref: EPA 524.2)	2-FEB-2022		
Chlorinated Pesticides and Organohalides by EPA 508.1	4-FEB-2022		
Miscellaneous			
* Dioxane, 1,4-, P&T GC/MS

Test descriptions preceded by an asterisk "*" indicate that testing has been performed per NSF International requirements but is not within its 17025 scope of accreditation.

Unless otherwise indicated, method uncertainties are not applied in any determinations of conformity. Testing utilizes the requested sections of any referenced standards, which may not be the entire standard.

Dates of Laboratory Activity: 31-JAN-2022 to 07-MAR-2022

The reported result for Total Recoverable Phenolics, Potassium, Molybdenum, Silica, Total Phosphorus, Radon, Sr-89/90, Bicarbonate, Bromochloroacetic Acid, Total Haloacetic acid, Bentazon, DCPA Acid Metabolites, EPTC, Dimethylphthalate, 2,6-Dinitrotoluene, 2,4-Dinitrotoluene, Molinate, Diethylphthalate, Terbacil, Di-n-butylphthalate, p,p'-DDE (4,4'-DDE), Butylbenzylphthalate, Trichlorotrifluoroethane, Methyl Ethyl Ketone, 1,2,3-Trimethylbenzene, Epichlorohydrin, or 1,4-Dioxane if performed, cannot be used for compliance purposes within the State of Arizona.

This report shall not be reproduced, except in its entirety, without the written approval of NSF. This report does not represent NSF Certification or authorization to use the NSF Mark. Authorization to use the NSF Mark is limited to products appearing in the Company's Official NSF Listing (www.nsf.org). The results relate only to those items tested, in the condition received at the laboratory.

Certifications are not offered for these compounds in a drinking water matrix.

The reported results for Total Recoverable Phenolics, pH, Bicarbonate if performed, are not covered by New York State drinking water certifications. NSF is not certified for Chlorine Dioxide, Chloramines, Total Residual Chlorine, Bromochloroacetic Acid, Total Haloacetic acid, Bentazon, DCPA Acid Metabolites, EPTC, Dimethylphthalate, 2,6-Dinitrotoluene, 2,4-Dinitrotoluene, Molinate, Diethylphthalate, Terbacil, Di-n-butylphthalate, p,p'-DDE (4,4'-DDE), Butylbenzylphthalate, Trichlorotrifluoroethane, Methyl Ethyl Ketone, 1,2,3-Trimethylbenzene, Epichlorohydrin, or 1,4-Dioxane in the State of New York.

Notes:

1) Bottled water sold in the United States shall not contain Fluoride in excess of the levels published by the USFDA in 21 CFR Part 165.110. These levels are based on the annual average of maximum daily air temperatures at the location where the bottled water is sold at retail. Please refer to the most current edition of the regulation to determine the Fluoride maximum level that pertains to your product.
2) A blank on the FDA SOQ column indicates that no maximum level has been established by the FDA for that contaminant.
3) An ND result means that the contaminant was not detected at or above the reporting limit.

For a list of NSF International Method Detection Limits refer to
https://d2evkimvhatqav.cloudfront.net/documents/external/minimum_detection_level_spreadsheet.pdf

This report shall not be reproduced, except in its entirety, without the written approval of NSF. This report does not represent NSF Certification or authorization to use the NSF Mark. Authorization to use the NSF Mark is limited to products appearing in the Company's Official NSF Listing (www.nsf.org). The results relate only to those items tested, in the condition received at the laboratory.
