

Loosen the two screws on both sides of labeler close to letter head.

Move them left or right as instructed on above diagram.

*it's better not to change the position frequently.

CAUTIONS

- Do not drop the labeler from 1m or higher above the ground or do not expose it to places where shocks occur.
- The Labeler consists of A.B.S. and P.O.M. resin that are sensitive to chemical reactions, especially A.B.S. Do not expose to heat over 60 degrees Celsius(60°C).
- Do not inject general ink into Ink Roller. Special ink should be used for the product, otherwise the band will be damaged.

PRICE LABELLER

Operating Instructions

Pull out **Label Case** as shown.

Pull out **Base Plate** by pulling back **Plate Open Keys** on both sides of labeler.

Load **Label Hanger** inside of Label Case.

Insert Roll into Tunnel above "**LABEL**" sign until you see 10cm of label paper coming out of the bottom. Then close **Label Roll Cover**.

Close **Base Plate**.

Line up **Holes** with Feed Roller's sprocket pins : prominent parts.

Close **Base Plate Cover**. Be careful not to detach stickers of label.

Squeeze and release lever three times for trial. Then the labels come out. Attach labels by **sliding** it onto a desired place of product.

ATTACH LABEL ONTO DESIRED PLACE OF PRODUCT.

Replacing Ink Roller

Press and pull apart **Ink Roller Case**.

Pull **Ink Roller Holder** by its grip.

* Widen Ink Roller Holder's sides, and replace Ink Roller with a new one.

Setting Letter Head

1. Pull out or push in Dial Shaft to a desired digit of **letter-band** then turn the shaft.

2. After you set up all letters, push in the shaft completely.
